299/7, PyinMaMyaint Street,
Thuwunna, Thingangyan
Township, Yangon.

EDUCATION

2011 – 2017

WEST YANGON

TECHNOLOGICAL UNIVERSITY

- Bachelor of Engineering in
Civil Engineering

SKILLS

- HTML5, CSS3
- Bootstrap, Tailwind
- Javascript (ES6+)
- React.js, Next.js
- PHP, Laravel
- Restful APIs, JSON
- MySQL, Prisma
- Git, Docker, Linux

LANGUAGES

- English (FLuent)
- Japanese (Basic)

PROFILE

Full-Stack Developer with 4+ years building scalable, user-focused web applications and business systems. Skilled in React / Next.js frontends and PHP / Laravel backends, RESTful APIs, Prisma / PlanetScale and MySQL; experienced with Docker, Git and Kubernetes to streamline CI/CD and deployments. Proven record leading requirement gathering, UI design and cross-functional teams to deliver ERP, POS, school management and admin-dashboard projects from concept to production.

WORK EXPERIENCE

■ RITZ Cyber Security,

JUNE 2024 – MARCH 2026

Senior Web Developer

- Requirement Gathering & UI Design:** Conducted direct consultations with clients to define core business logic and translated requirements into functional UI/UX designs using Figma.
- System Architecture & Database Design:** Collaborated closely with the Team Lead to architect the system infrastructure and design robust database schemas.
- Backend & Dashboard Development:** Engineered the admin dashboard and secure backend services (using Laravel), facilitating weekly client syncs to ensure flawless execution of business logic.
- Cross-Functional Leadership & QA:** Supervised mobile developers to ensure seamless API integration and actively participated in comprehensive system testing.
- DevOps & Deployment:** Containerized applications using Docker and assisted in writing Kubernetes YAML configurations to streamline the deployment pipeline.

■ UTO Trading Company

May 2023 – May 2024

Web Developer

- Legacy System Modernization:** Spearheaded the transformation of a legacy Google Sheets-based workflow into a fully customized, high-performance Point of Sale (POS), Inventory Management, and Accounting application.
- Modern Full-Stack Architecture:** Architected the application using React for the frontend interface, Prisma as the ORM, and PlanetScale for a highly scalable serverless database, ensuring seamless performance.
- Automated Deployment Pipeline:** Managed the deployment and hosting infrastructure utilizing Vercel, streamlining the continuous integration and delivery (CI/CD) process.

WORK EXPERIENCE

I-360 Organization

MARCH 2022 – NOVEMBER 2023

Web Developer

- Vendor Management & Project Oversight:** Directed and supervised a third-party development agency during the creation of the organization's website, ensuring strict alignment with business requirements and technical quality standards.
- System Maintenance & Feature Expansion:** Assumed full ownership of the application post-deployment, actively maintaining the system architecture and engineering new features to continuously enhance website functionality.
- Data Management & CMS Administration:** Managed ongoing data integration and administered the Content Management System (CMS) to ensure accurate information flow and up-to-date digital content
